Earthian Calendar Anand

28 days in a month and 13 months in a year calendar.

A year is 365 days 5 hours 59 minutes 19 seconds. Dividing from 364 days to 28 days gives 13 months. In which 12 months is 28 days and 13th month being 29 days, because today only 28 days of the month is going on. In this way there are 13 months in a year. But we have names for 12 months, so what should we name the 13th month? This is a question to ponder. This 13th month we can name 'Earthian Month Anand' and we can celebrate 'Earthian Month Anand' every year and 'Earthian Day Anand' on the 29th day of the 13th month. This 29th day will be a holiday and the new year will start from the next day. We will call that day Anand Day or Joy Day or Earth Day or Holy Day, that is, a day of purity. This 29th day will be of 30 hours and the remaining 364 days will be of 24 hours. Because we have the remaining 5 hours 59 minutes 19 seconds after 365 days, we will consider it as 6 hours and add these remaining 6 hours to the 29th day of the 13th month. Whereby the completion of the 29th day of the 13th month would be at 6 o'clock in the next day instead of 12 o'clock at night and similarly the first new year would start from 6 o'clock in the morning. Which will be the first date of the first new year. Then in the same way, by adding 6 hours at 6 in the morning of the 29th day of the 13th month of the second year, the new second year will start at 12 o'clock in the afternoon on the same day. Similarly, the next third year will start at 6 O'clock in the evening and the fourth year will start from 12 O'clock in the night. Then the fifth year will start at 6 o'clock in the morning like the same first year, and thus the cycle will start from every fifth year. This four-year cycle will continue in this way and thus we will have the correct calculation. Because now that everything is being reformed, why not reformulate the calendar as well. So that the calculation is correct so that the results are correct. Therefore, it is necessary to reformulate the calendar. This 'Earthian

Calendar Anand' is 13 months old. Which is designed according to the orbit of the Sun by the Earth. In which the Earth revolves around the Sun in 365 days 5 hours 59 minutes 19 seconds. The first month of this 'Earthian Calendar Anand' is January and the last month is 'Anand' and the last day is 'Anand Day'. 'Anand' means 'Joy'.

It is the calendar of the earth. We live on earth. This calendar is according to the time the Earth takes a round of the Sun. There are more planets circling the Sun and the days of circling those planets are different. Therefore, the calendars of those other planets are also different. Out of all those planets, there is only life on Earth and Earth gives facilities to all living beings to live life. Therefore, according to the number of days on which the Earth completes one year by circling the Sun, it is "Earthian Calendar". With this, we can understand the Earth correctly and also keep our calculations correct. Now we have the best machines, which give us correct calculations and store our data. Therefore, we should give Tribute to the Earth and adopt the name of the Earth as "Earthian Calendar" whose nickname is "Anand Calendar". Anand means "Joy". We all enjoy ourselves on earth. By reforming the calendar in this way, we will forget all the previous experiences and we will have a book of new and blank pages. Which has only one day of the festival and that too on the last day of the year which has thirty hours. That is, the 29th day of the month of Anand or "Day of Joy". On that day we will worship the earth. And will enjoy the whole day. There will be a holiday every Wednesday-Thursday. Because Wednesday is the day of the Earth and Thursday is the day of the Earth's gravity. We are all on earth due to the gravity of the earth. Therefore, every Wednesday-Thursday we will worship the earth and we will start the week from Monday. This calendar will unify entire countries. Therefore, adopt "Earthian Calendar Anand" from the year 2024. It is necessary for the good of all humanity. The 2024 A.D. is the 1st year of the 'Earthian Calendar Anand' and it's shown like this 1 E.C.A.

According to the earliest calculations, there was a 28-day month according to the 28 Nakshatra. The month of 28 days is also for women.

The woman started keeping track of the month. It was the women who started calculating the time and for this, the women resorted to the constellations of the sky and also used the moon and also took the help of the seasons. In this way, women resorted to different methods of calculation. Then they were divided into days, months and years.

Earlier there was a 10-month year. In which there were 28 days in each month i.e. a year of 280 days. The method of calculating this was that 280 days according to the 10 months of pregnancy of the woman i.e., 28 days. This 280 day is 10 months i.e., it is not 9 months.

When the man started farming, he started calculating the year according to the rainfall. So that the weather can be accurately detected. This calculation of the man was based on the rotation of the Earth by the Sun. Because he believed that the Earth is stationary and the Sun revolves around the Earth. So, this is how the man started calculating the year. At the same time, the man combined his calculation with the woman's count, which led to the birth of a calendar. There is an association of 4 days and 5 days in the calculation of a woman. Which is 9 days together. These 9 days occur every month in the life of a woman. These are 9 days off. Therefore, these 4 days were written in red and 5 days were written in yellow and the remaining 19 days were written in white. The rest of the 19 days were for work. When the woman became pregnant, 280 days of the next 10 months were shown in green colour. Which is called lap green and the next 9 days when pregnant, comes in the 10th month. These 10 months are called one year. Then 9 days after the birth of a child are happy days for a woman. But the man reduced these 9 days to 7 days and made the week. Those who get pregnant from the time of childbirth till the birth of these 280 days get 40 weeks by dividing it from 7 days of the week. That is, a man does not have to associate with a woman for 40 weeks and has to follow celibacy. The man had to take care of these things. The man who knew this woman's system well. Therefore, he was called a male royal and was called a king.

As the man's calculations were based on the weather, he made the calendar according to the weather. This calculation of a man is called

a year because it is based on rainfall and the year was made according to the number of days of rain. But the calendars of men show different calculations according to the geographical environment of their respective countries. But the calendar of women is still 28 days and in which 9 days are on leave. In these 9 days, the nature of a woman varies from day to day. So, these 9 days and 9 marks have importance. In the remaining 19 days, the nature of the woman remains the same. So, there is also a saying that "there is a difference of 19 or 20". This saying is because a man calculates the nature of the woman, but when the man forgets this calculation, it says the difference of 19 or 20 twenty. Then the day the woman becomes pregnant, after that, the nature of the woman remains good for 10 months. Therefore, the man wants to keep the woman pregnant and wants to keep the children entangled so that the woman remains in the man again. But nowadays a woman avoids getting pregnant by using contraception and keeps the man under control. Today, a woman is freer and happier than a man.

So, in this way, the calendar is made by women, but the men have amended it over time and told it to be their own. Since it is the time of women, why not apply the calendar of women all over the world. Which benefits women.

So, everybody new Heartiest congratulations and best wishes to "Earthian Calendar Anand"!

Thank you very much for your cooperation!

- a. 12 months are 28 days and Last 13th month is 29 days in every year and Year's first 364 days are 24 hours and Last day of the year is 30 hours.
- b. 1st Day of the 1st month of the 1st year will start from 6 hrs in the morning for the whole year. (day time - from 6 a.m. To 6 a.m.) and last day of the year is 30 hours so it will end on next day noon 12 p.m.
- c. In the next 2nd year 1st of the 1st month of the 2nd year will start from 12 hrs in the noon for the whole year. (day Time - From 12 p.m. To

12 p.m.) and last day of the year is 30 hours so it will end on next day noon 6 p.m.

- d. In the next 3rd year 1st day of the 1st month of the 3rd year will start from 18 hrs in the evening for the whole year. (day Time - From 6 p.m. To 6 p.m.) and last day of the year is 30 hours so it will end on next day noon 12 a.m.
- e. In the next 4th year 1st day of the 1st month of the 4th year will start from 24 hrs in the night for the whole year. (day Time - From 12 a.m. To 12 a.m.) and last day of the year is 30 hours so it will end on next day noon 6 a.m.
- f. From the next 5th year this timing cycle will repeat.

— Brahmachari Prahladanand "Dhyanacharya"

Some Rules about Earthian Calendar Anand

- a. 12 months are 28 days and Last 13th month is 29 days in every year and Year's first 364 days are 24 hours and Last day of the year is 30 hours.
- b. 1st Day of the 1st month of the 1st year will start from 6 hrs in the morning for the whole year. (day time - from 6 a.m. To 6 a.m.) and last day of the year is 30 hours so it will end on next day noon 12 p.m.
- c. In the next 2nd year 1st of the 1st month of the 2nd year will start from 12 hrs in the noon for the whole year. (day Time - From 12 p.m. To 12 p.m.) and last day of the year is 30 hours so it will end on next day noon 6 p.m.
- d. In the next 3rd year 1st day of the 1st month of the 3rd year will start from 18 hrs in the evening for the whole year. (day Time - From 6 p.m. To 6 p.m.) and last day of the year is 30 hours so it will end on next day noon 12 a.m.
- e. In the next 4th year 1st day of the 1st month of the 4th year will start from 24 hrs in the night for the whole year. (day Time - From 12 a.m. To 12 a.m.) and last day of the year is 30 hours so it will end on next day noon 6 a.m.
- f. From the next 5th year this timing cycle will repeat.

“ ध्यानाचार्य ”

Dhyana Means Meditation

— Brahmachari Prahladanand
“Dhyancharya”

Hatimtai and Kundalini Power

— Brahmachari Prahladanand
“Dhyanaacharya”

Brahmachari Prahladanand "Dhyanaacharya"

Name of Shri Guru Ji His Holiness Mahamandalleshwar Acharya Shri Swami Vishveshwaranand Giri Ji Maharaj Sanyas Ashram, Vile Parle (West), Mumbai - 400056, India

Doing Meditation since the year 1995. Have done research on various disciplines of Meditation. Wrote a book on what I received after meditation - "Guru Gyan Urja" (Hindi) which was published in 2011.

Words kept revealing their secrets only while meditation, then wrote a book on words -? "Shabdon Ki Utpatti Kaise Huei ?" (Hindi) Which is published in 2019. Wrote another book written on carefully received messages in meditation- "Karo Meditation Karo" (Hindi) which is published in 2021. Wrote the English translation of this book - "Do Meditation do" which is published in 2021.

Published a calendar based on 28 days in a month and 13 month in a year named as "Earthian Calendar Anand".

Two poetry collections are written - First published in 2011 – 'Par Sukun Milta Hai' Second published in 2020 – 'Sahil Par Jindagi'

Keep encouraging people in the field of meditation And connecting with God in Meditation. Motivate people to keep their mind relaxed.
